

Fairfield Harbour Network (FHN)

1-5-2024

Fairfield Harbour has contracted American Fiber Infrastructure and Hosted America to provide the next level of fiber optic internet in Fairfield Harbour. How do the property owners benefit?

- Better product
- Best price, fixed price
- Customer service
- Additional Revenue stream for the community.
- It gives residents an option to Optimum.

Is there any cost associated with this to the POA?

- There is no additional outlay of money from the POA except for the investment of climatizing an office with a mini split (budget of \$4k.) This was paramount in keeping the Network Center on Campus.
- FH will have a revenue stream because Hosted America will pay us easement rights and residuals for access. Conservative numbers start at \$250,000 per year.

What is the probable timeline to start the project?

- Laying the fiber network is currently projected to take 18 months, starting after the 2023 Holidays.

Who is American Fiber Infrastructure and Hosted America?

- The American Fiber Infrastructure and Hosted America operates in 42 states and provides internet service to cities and communities. The Board researched references and visited multiple facilities that Hosted America currently provides internet services. For more information on Hosted America, click here:
